WORK EXPERIENCE

Freelancer, Arsh Agarwal, Washington, DC

September 2021 - Present

- Redesigned 3 no-code client websites in 4-8 weeks and maintained the brand experience for client sales funnels
- Updated client's frontend with a JS script so customers could get real time price quotes from submission forms and updated backend workflow to align with their business processes
- Helped client navigate AWS backend and profile

Project Manager, VersaAgency, Plymouth, MI (Remote)

January 2021 – October 2022

- Led or managed 6 web development projects in a team setting
- Learned Figma to create website prototypes used to gather feedback from clients and communicate requirements to developers
- Coordinated, organized, and executed meetings with clients and developers to gather and update requirements, display progress, collect feedback and build trust, confidence and excitement for the client

Web Developer, Intergalactic Education, California, MD (Remote)

June 2020-November 2021

- Collaborated with game developers, Tech Lead and CEO to build a responsive website that serves as a user portal and a storefront, integrating new functionality with existing functionality
- Learned C Sharp, Dot Net, and CSS to redesign website in 10 weeks and used AWS backend to update website
- Designed, coded, tested and debugged functionality and layout for responsive site
- Responded to design changes with agility and communicated concerns about impacts of change

IT Generalist, Freddie Mac, McLean, VA

January 2018-March 2020

- Helped teams across the company integrate their services with the company's new Web Service Gateway
- Developed and presented a website to demonstrate gateway capabilities to external and internal clients
- Earned 2 workplace recognition awards for customer focus
